

Mr. Rick Dykstra, MP

61 Geneva Street

St. Catharines, ON

L2R 4MC

Dear Mr. Dykstra,

As a life-long resident of St. Catharines, I've seen the manufacturing industry decline over the last 5 or more years. Jobs have disappeared on a huge scale.

However, I'm told that renewable energy is going to create employment in all sectors especially skilled trades. I have yet to see this happen for me personally. I hear that port Weller is planning to get into the wind energy business. I don't see support from your government for them either

I am a skilled and experienced electrician. What are you doing to help improve the work situation for me? Since Parliament is not sitting, please contact me and let me know what you can to provide me with hope for future work.

Thank you
