Dear Mr. Dykstra,

As a lifetime resident and conservative supporter, I was hoping that you would be supporting Port Weller Dry Docks by helping them get federal contracts for new ships. Much to my disappointment, I have learned that your party is however supporting the exporting of this work as part of the free trade agreements.

I'm disappointed in you and your party. You obviously don't care about the common ship building worker. Please contact me and let me know when you will support the ordinary person in your riding.

Sincerely

Mr. Rick Dykstra

Dear Mr. Dykstra,

I have seen you attend and support the opening of new businesses in St. Catharines. I think this is a good thing to do for our community. However, I don't see any support from you for the shipbuilding industry.

I have worked at PWDD when it was busy building new ships. I've not worked there now for years as no new ships are being built there. Why is your government spending tax dollars to build ships on the east coast but not supporting our local ship building industry?

As our elected representative, when will you support local work for us as we too need jobs and a future?

Regards

Mr. Rick Dykstra

Dear Mr. Dykstra

I served my electrical apprenticeship building ships. It was a great place to work and develop skills that I use every day to feed my family.

Over the past years I have seen the shipbuilding industry decline to the point of no new ships being built here. With all the outstanding ship building facilities and skills we have here, why don't we build ships for the government use here? What are you doing to support the new ship building industry? Please contact me in this regards

Yours truly

Mr. Rick Dykstra

Dear Mr. Dykstra,

I see and read of all the dollars the federal government is spending to stimulate the economy. I also sense that not enough of it is actually being spent versus promised to local efforts.

If the government really wants to help our area and you really believe in this, the best bang for the buck in helping our area recover from industry losses would be to help the ship building industry here and now. Why are you not supporting this industry?

Please represent us and get us jobs for the future now. I look forward to hearing from you.

Sincerely

Mr. Rick Dykstra

Dear Mr. Dykstra,

As a social conservative, I applaud the government's efforts to help Canada weather the economic storm. However, I have not felt any of the "efforts" personally. I am an experienced marine electrician and do not see any help being provided to the new shipbuilding industry here.

As our representative, I ask you to help us get work at Port Weller in the new ship building market.

I read that Mr. McKay's riding got work. How about getting us some work building new ships?

Please contact me and let me know what you're doing to support and help me.

In hopes of hearing from you,
